

Thank you for choosing a Nuad Thai Certified salon!

The above sticker means that this massage parlor has received Nuad Thai certification. This means that the salon meets ethical and business standards. The certification means that the salon has completed a training program and meets the requirements of the Environmental Code on hygienic treatment activities.

The certification certifies that the owner/holder of the salon:

- has completed at least 150 hours of training in Nuad Thai.
- has completed a course in social orientation aimed at providing basic knowledge about Swedish society, obligations and rights.

The course is coordinated by ThaiWISE and includes courses in:

- The Swedish social and educational system and what is required to work in Sweden.
- Rights issues concerning everyone's right to good health and medical care.
- The Swedish tax system and everyday legal issues

- has undergone business training aimed at providing basic knowledge about the rules and laws required to start and run a business in Sweden.

The course is conducted by ThaiWISE in cooperation with Nyföretagarcentrum and consists of, among other things:

- Business forms, pricing, business plan with associated budget and marketing.
- The right to pension and unemployment insurance and various issues related to labor law.

- The certification certifies that the environmental administration has carried out an inspection of the massage parlor and that the parlor at the time of the inspection was deemed to meet the requirements of the Environmental Code on hygienic treatment activities. This means, among other things:

- That the business's premises, hygiene routines and self-control are considered sufficient.

The certification is carried out by ThaiWISE (Thai Women in Sweden Empowerment Project) with the support of the City of Malmö. Businesses that are part of the certification program will be offered additional training and receive regular checks from the environmental administration.

Thai massage - in Thai Nuad Thai - was recognized as an intangible cultural world heritage by UNESCO in 2019, which means, among other things, that the tradition is worth preserving for future generations. Nuad Thai is a non-medical manual therapy involving bodily manipulations through which therapists help to balance patients' bodies, energy and structure.
